Letter from TS Lee, Candidate for Daly

My response to your 9 questions are as follows:

Yes to Questions 1, 2, 4, 5, 6, 7 8 and 9. In regards to Question 3, the reply is Yes but with a total ban that goes on after 5 years and no moratorium.

There is already abundant evidence of damage, contamination, pollution, etc to the Mother Earth by fracking and other mining of natural resources in other parts of the country and overseas. I think the resolution is to solve the issue of money that can be generated in other industries for the government.
